Impact of Social Media on Society

Date : 17/02/2024

Area : Rest camp kali bari

Introduction:-

Social Networking Site is known as the web-based services that allow every individual to create their profile and connect people. The term "SOCIAL MEDIA" is now the most popular and becomes an essential part of everyone's social life. Social media has provided a medium or platform where users can interact, communicate, and share different types of important documents, images, and videos and provide ease of understanding and work. The number of social media increases with growing popularity and advancement among the people, some famous and familiar social media (WhatsApp, Facebook, and YouTube) . The Concept of Social media was established in 1978 when the first social media was introduced, called the bulletin board system (BBS).

Objectives of the survey:-

- I. Considering the current trend of usage of social media the main objective is to check the cause and effects of increase use of social media.
- II. To explore the impact of social media on people's relationships, family and friendships.

Some of the questionnaires regarding impact of social media are discussed below:

In the area of rest camp kali bari we question the locals about "impacts of social media on society" that how it effects their relationships, family and increasing uses of social media etc.

At present nobody denies the blessing of social media especially to cope with personal, social, political, and official lives. People can communicate with each other from one part to onether.

There is an increasing use of social media, which show the rapid growth of users. More adults and teenagers are involved with social media by accessing facebook, Youtube, Twitter, Instagram and so on.

Usage Of Social Media

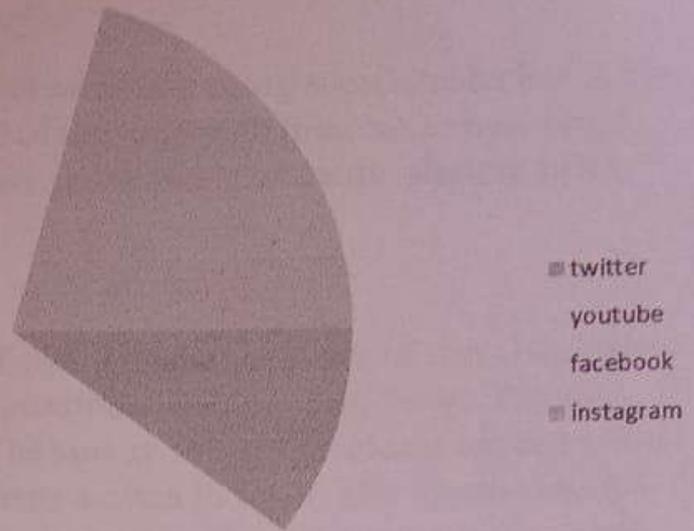

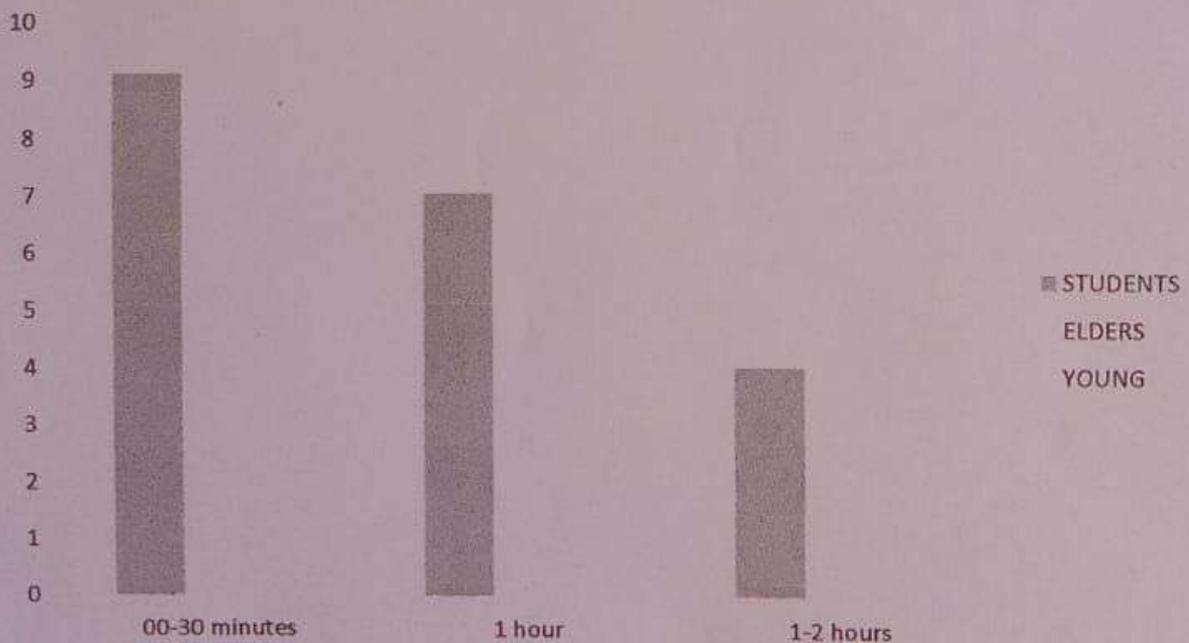

Figure 1: Use of social media

According to survey conducted related using facebook, youtube and other social media websites specially Youtube and facebook is most in use.

According to survey, which analyse that most people on that area of Rest camp kalibari spent 1-2 hours on social media, fewer spend less than an hour on

social media. Fig 2 categorizes the group of ages into three parts i-e Young ones, students and elders and shows their interaction on social media in graphical form.

In present times most of the peoples got addiction using social media but in the area of our survey, locals spends most of the time with thier love ones, family and work even in a free time only fewer spent on social media slightly often.

Conclusion

The reasearch presented the impact of social media on locals of rest Camp Kali Bari. A survey conducted on several questionaries (age,spent hours, favor) regarding different social networks. The survey shows that elders are not often in favor of social media sites but students a often in favor. The parents should need distract them a bit more from using social media. How ever the uses of social media is in control and spends time on an other activity.
